

Xplora science teachers conference 2006

Comments from some visitors

We thank the whole staff for the perfect organization of the meeting. It was a very important comparison with teachers and experts.

Carlo Nati and Linda Giannini - Italian teachers

Many thanks for the collaboration and the support during the Conference. It has been really interesting and has provided new suggestions for my work activities .

Boris Goldberg, e-Projects Regional Co-ordinator

Thanks for the great organization and the pleasant atmosphere during the conference. I enjoyed it a lot and it was inspiring for my work.

Susanne Flaschin - LOKANDO AG

Thanks for the nice conference organization and for the kind welcome.

Carlo Burichetti - Italian teacher

Thanks for this excellent organization

Christophe Chaffardon - Cite de l'Espace

Thank you all for this experience and we hope that many science teachers in Europe will take part in Xplora projects. Congratulations to organisers and thank you very much!

Lidia Minza - Romanian teacher

I would like to thank all the organizers of the conference, who gave us the opportunity to meet each other (once more) and share our experience about Science Education at CERN, which is a myth for every Science Teacher! This time our team (XPLORA) was enriched by the presence of the other participants and I think that this was really very important for us (as European teachers) and for our students, too.

Assimina Kontogeorgiou - Greek Teacher

I'm gathering the nice experiences I have had at CERN. I would like to express my deep appreciation about the way you managed the conference. From the very first moment when I arrived to CERN, I had good feelings regarding the way you prepare yourself and the way you implement your plan. I also like to share with you my feelings regarding the idea of Xplora, which is a powerful approaches. I'll be happy to work with your website.

Xplora science teachers conference 2006

Hopefully, sometime in future I even contribute to it.

David - D-Space teacher
